Three Story Complex

What is the GreenOffice project?

A GreenOffice is a place to work. For some people a GreenOffice is a place to live. Setting up these spaces often involves a great deal of work. The GreenOffice project is designed to assist the setup of this space.

What does the project offer?

The GreenOffice project offers you either a custom built space or a customized space which you purchase outright or lease. This space is configured with all of the standard amenities you would expect in a modern office.

We understand that you are special and that you most certainly have special requirements. Therefore, before any foundation is laid or any contract signed we discuss these essential additions which are going to make your office not only successful but also scalable.

How do I find out more?

Simply visit the Lucid website and click on the contact link and send us a message expressing your interest in the GreenOffice project. Then we will get back in touch with you to arrange a time to discuss your new GreenOffice.
