

PRINTINGWORKS : RECOVERING PRINTING COSTS

WWW.LUCIDSYSTEMS.ORG

QUESTION:

How much money do you recover just by charging a few cents per print.

HYPOTHESIS:

A print accounting system will reduce the cost of printing to the institute as a whole by making departments or individuals responsible for printing costs.

PROCEDURE:

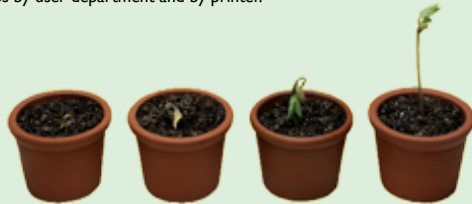

The following table shows how much an institute pays per page of paper and the amount we charge per page printed

COST PER PAGE PRINTED	CHARGE BACK PER PAGE
\$0.05	\$0.03

CONCLUSION:

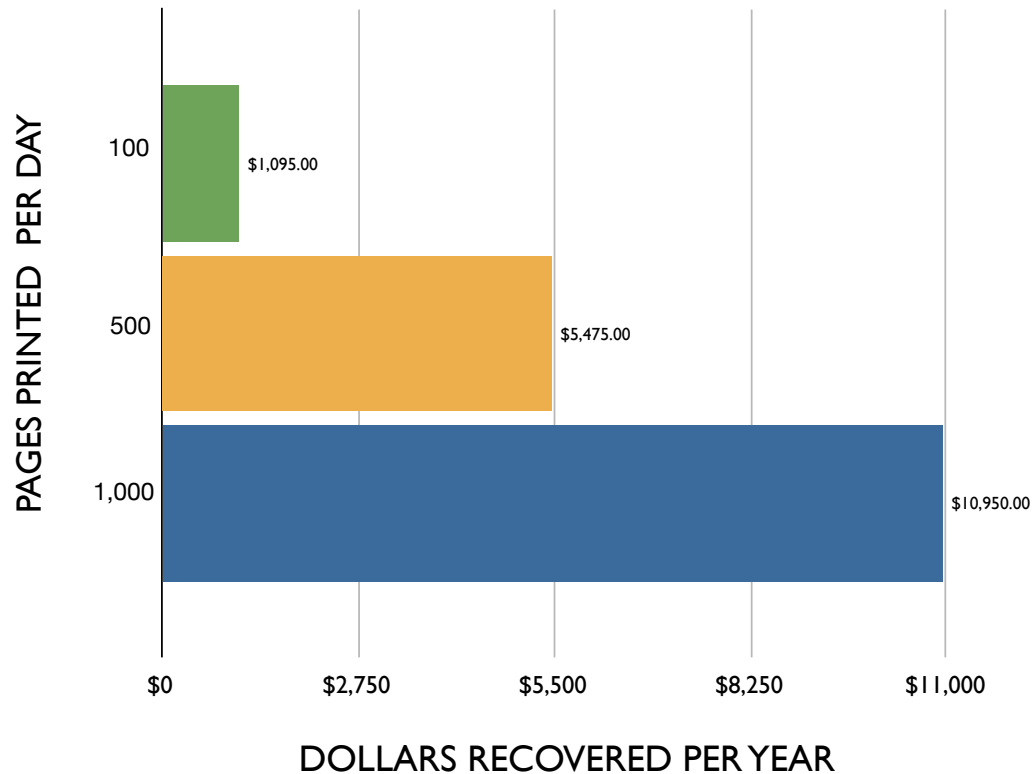

An organization printing just 100 pages per day will save a substantial amount of money each year. In addition you will be able to see how many pages are being printed per day in your organization.

PrintingWorks the open source print accounting solution is able to track jobs by user department and by printer.

By charging back departments or individuals, people will think twice before printing. Therefore, you not only save money by deploying a charge back print accounting solution, you also help the planet.

MONEY RECOVERED EACH YEAR BY IMPLIMENTING CHARGE BACK

RECOVERING PRINTING COSTS : PRINTINGWORKS : OPEN SOURCE PRINT ACCOUNTING SOLUTION

NUMBER OF PAGES PRINTED PER DAY	COST OF PRINTING PER DAY	FUNDS RECOVERED EACH DAY	FUNDS RECOVERED PER MONTH	FUNDS RECOVERED PER YEAR
100	\$5.00	\$3.00	\$84.00	\$1,095.00
500	\$25.00	\$15.00	\$420.00	\$5,475.00
1,000	\$50.00	\$30.00	\$840.00	\$10,950.00
